Dear Dr. Dabaghian,

Referring to your letter below regarding the imported health requirements for dries milk, please find the following conditions

Milk and dairy products:

It includes the following materials (butter, liquid milk, powdered milk, processed cheese, all kinds of cheese, whey, cream, spreadable cheese, milk smoothies, yoghurt and other milk-based products with few additives for industrial purposes, milk fat, casein...), which are required by the Imported include the following conditions:

1-Each consignment shall be accompanied by an international veterinary health certificate that includes the following:

1-1. Milk and its derivatives are free from pathogens and suitable for human consumption and were manufactured in a way that ensures the elimination of viral, bacterial and fungal pathogens.

1-2. Packed in airtight containers intended for packing food.

1-3. Manufactured and packaged in officially licensed laboratories and under official veterinary supervision.

1-4. The substance should not have passed more than half of its shelf life, when it reached the country.

Thank you for cooperation

Best regards
